

### **MAAK LED FISHING LIGHTS**

The MAAK fishing lights (LED) have finally grown up to become a hybrid fishing & shrimping light. The best feature is you can make this green fishing light fire off both green LED strips green at the same time.

This light contains 2 LED strips independent of each other. You can fire off 1 or both strips at the same time depending on the light intensity you desire. This is done via the 2 positive battery clips and 1 negative battery clip.
